

employee.ts

```
type Employee = { name: string; job: string;}

function greet(employee: Employee): string {
    return `Hello, ${employee.name}!`;
}

let alice = { name: "Alice", job: "librarian", isAdmin: true };
let bob = { name: "Bob" };

greet(alice); // Output: "Hello, Alice!"
greet(bob); // Error: Property 'job' is missing
```
