

```
1 students = [(1, 99), (2, 60), (3, 55)]
2 matchFirst key (k, v) = k == key
3 filterById = filter (matchFirst '1') students
```

Char

'1'

✖

'1' has a Char type

'1' needs to have an Int type

How to fix

Other ways to fix the error

Why

Why

'1' is declared as a Char literal.

```
1 students = [(1, 99), (2, 60), (3, 55)]
2 matchFirst key (k, v) = k == key
3 filterById = filter (matchFirst '1') students
```

Int→(Int,Int)→Bool

✖

Char

'1'

✖

'1' has a Char type

'1' needs to have an Int type

How to fix

Other ways to fix the

Why

Why

'1' is used as an argument of matchFirst, whose type is Int→(Int,Int)→Bool.
